THE MALTESE NATIONAL CANINE FEDERATION

(The breeder must complete this form and send it together with the litter registration form signed by all parties)

APPLICATION FOR THE REGISTRATION OF PUPPIES PRODUCED BY ARTIFICIAL INSEMINATION (AI)

FORM 6

Guide to completing this form

The owner who wishes to register a litter of puppies produced by AI should complete this form.

Whilst a special application is required at the time of registration, prior approval is not required to register a litter of puppies produced by AI but the breeder and owner of stud dog must complete this form and send it together with the Litter Registration form (Form 1), with all the signatures required.

All litters produced by AI will be subject to existing MNCF registration regulations.

The MNCF will accept an application to register a litter produced by AI from either overseas dogs or those domiciled in Malta but the AI must be declared on the litter application form (Form 1) at the time of registration.

In the case of a stud dog domiciled outside of Malta, the dog must be registered with a recognized overseas Kennel Club, and confirmed by a copy of a 3 generation pedigree issued by the Kennel Club of the Country in which the dog is domiciled. Such pedigree must include the registration numbers of all the dogs which appears on the pedigree.

The Registration Certificates of the puppies will be endorsed with the initials (AI) after the dog's name to indicate that they were bred by artificial insemination.
